

2024 STEM Symposium

Clayton State University - College of Information and Mathematical Sciences

The College of Information and Mathematical Sciences at Clayton State University held their third annual Symposium "Advancing Social Mobility Through STEM" in March of 2024. The two-day event focuses on advancing social mobility through STEM and will feature presentations by guest lecturers, faculty, and current students, plus panels covering topics for both current students and alumni. The Symposium hosted nearly 800 students, faculty, alumni, and industry leaders. The Symposium helped create undergraduate scholarships for CSU students in STEM.

Key Note Speakers:

Commissioner Jerica Richardson represents the eastern part of Cobb County which includes Smyrna, Vinings, East Cobb, Cumberland CID, and other parts of unincorporated Cobb County. Her platform is predicated on the idea that when we are connected, we can empathize, and overcome any challenge. Being a diverse metro county, her primary goal is to use the challenges the county faces to elevate conversations that communities around the country should be having. Such challenges on the horizon include rapid and diverse growth, balancing development demands, environmental stability and technology, discrimination, trust in law enforcement, recession-proofing the community, and long-term wealth gaps and inequality. She believes in working closely with the community and that there are only permanent interests in advancing public welfare. As a private citizen, Jerica is a Georgia Tech graduate in Biomedical Engineering, and works full time as a Program Manager at Equifax. She is also a small business owner and author.

Shane Bell is a Georgia native who grew up near Atlanta. He earned a bachelor's degree in history and a Master of Arts in Liberal Studies from Clayton State University. Shane worked for The National Archives as a student employee beginning in 2007 and joined the agency full time in 2011. In his years with NARA, Shane gained experience working with a wide variety of federal records and performing numerous duties in the archival field. His main areas of focus include records from NASA and the Atomic Energy Commission. He has compiled finding aids for federal holdings related to The War of 1812, the 19th century illegal slave trade, the Civil War, The Manhattan Project, and 20th century science and technology. In 2022 Shane became NARA's Subject Matter Expert (SME) archivist for agency-wide NASA and related records.

David Byrd is an accomplished leader and technical executive focused on driving customer success at global enterprise clients via cloud, hybrid, and on-premises solutions. He is a Georgia native and alumni of Clayton State University. David has been at Google Cloud for three years as the Global Lead for Assured Support and Cloud Support Atlanta Site Lead. Before his current role with Google, David was a Distinguished Engineer at IBM for over 20 years. Throughout David's three-decade career, he has had the opportunity to travel the world working with a wide range of customers. He has co-authored numerous technology books and presented at various global events.
