# Connect to fast WiFi in your residence hall

- Visit **xfinityoncampus.com**
- Find your school
- Sign in using your student username and password
- Once signed in, visit the Account tab. Then, under the Profile tab, you'll find your WiFi information.
- Locate **Housing RESIDENT - Xfinity** in the list of available WiFi networks

**Note:** If you lived in this building previously, we encourage you to "forget" the network on your device and sign in again with your password from **xfinityoncampus.com**.

After you have signed in once with your device, you will automatically connect to the network in following sessions.

## Guest access to WiFi:

- Your guests may access WiFi by connecting to the **Housing GUEST - Xfinity** network

xfinity | CLAYTON STATE UNIVERSITY

## Support:

Need help with your internet or streaming services? Sign in to **xfinityoncampus.com** and navigate to the Support tab to receive support. The Xfinity Assistant tool within the portal can connect you with a live chat agent for instant support.

You'll need to be in your campus housing and have with you the device that's experiencing connectivity issues. Please make sure you have ready:

- Your university email address
- Your campus housing address
- Your residence hall number (if applicable)
- Your phone number
- The ticket number for an existing issue, which makes it easy to pull up your account information

Please note: If your university credentials do not allow you access to your residence hall's WiFi, please reach out to your university's IT team for assistance.

**Get the speed you need at a great price.**

Visit **xfinityoncampus.com** to see how you can step up your internet speed so you can download and upload even faster.

Scan the code to activate your Xfinity WiFi or visit **xfinityoncampus.com**.

Standard data charges apply.
